Brunswick, ME 04011

SUBJECT: Approval of FujiClean CEN Series model for Best Available Technology Class II.

Dear Mr. Samuelson:

On behalf of the Best Available Technology (BAT) Review Team, I would like to inform you that the FujiClean CEN Series system has received approval for Best Available Technology Class II. The following documents were used in the approval process:

1. NSF 245 Testing Data Waco Texas (April 2015)
2. Japanese compliance data submitted by manufacturer for cold weather comparison.

The approval gives the manufacturer unlimited installations using BRF with the certain conditions that are outlined on the MDE BRF webpage. Failure to meet the conditions on the webpage may result in a revocation of BRF eligibility. Class II technologies are considered BAT and are eligible for use anywhere a BAT is needed by regulation. The Class II technologies are not eligible for grant funding under the BRF program.

For details regarding your approval or conditions please feel free to contact me at (410) 537-3635 or at Joshua.flatley@maryland.gov

Sincerely,

Joshua Flatley
Coordinator/ Chair BAT Technical Review Committee
